```cpp
#include <iostream>
#include <queue>

using namespace std;
int main() {

//put the number in the string
queue<string>numbers;
//push the number in the queues
numbers.push("10");
numbers.push("24");
numbers.push("28");
numbers.push("32");
numbers.push("30");

while(!numbers.empty()){
    cout <<numbers.front()<< "has been inserted successfully" <<endl;

//pop the number out of the queues
    numbers.pop();
}
    cout<<"Queues"<<endl;
    cout<<"is being deleted" <<endl;
    return 0;
}
```
